Eva

Please find attached the live Excel file for your use. As previously mentioned this Excel file will be updated monthly as necessary. Also attached is a pdf of the graphs with corrected dates. Amec Foster Wheeler did not adjust the scales for each graph as you have the file to play with as you wish.

We are in the process of compiling the complete log for W-37 and will send shortly.

Don —

I appreciate your willingness to provide additional information when we have questions about some part of the SEE process or other aspects of the ST-12 site. To make the information you provided yesterday more understandable, and to put it in perspective, it would be helpful if you could:

- Correct the dates on the graph for W37 before bailing/pumping (I don't believe you were out there measuring depths in 1900)
- Put these before and after graphs for W37 on the same scales so that they can be more easily compared (it might be helpful if you sent them as an Excel file so I can play with the scales as I want to)
- Please provide the table with the complete history of the amount of LNAPL removed from W37, so we can see how much was accumulating there prior to the start of SEE

Thanks - Eva
